Learn COBOL in One Video

Posted by [Derek Banas](#) on Apr 23, 2020 in [Web Design](#) | [0 comments](#)

COBOL runs the US Financial System, Social Security Administration, Department of Defense, Internal Revenue Service, the Majority of State Financial / Unemployment Systems and Numerous other Critical Systems. Currently there is a critical need to create more COBOL Programmers.

In this one video I did my best to cover what you'd learn about COBOL in a standard 500 page book. If there is a demand for more videos I will make them here for free.

COBOL Tutorial : Learn COBOL in One Video
